

Your home is your largest investment. It's your place of comfort, security, family, memories, giving and sharing. And a place that's supposed to *function* while providing all this. That's why we created this as part of joining our Comfort Club®.

Here's what you can get as a member...

- **SEASONAL MAINTENANCE:** Included at no additional charge (when done during scheduled times). Tune-ups save you money.
- **FREE REMINDERS:** Take this one off your "to do" list. We handle everything to keep you on schedule!
- **INCREASED EQUIPMENT LIFE:** The #1 reason for system failure is dirt! Properly maintained equipment lasts longer.
- **LOWER UTILITIES:** Properly maintained heating and cooling equipment keeps more energy dollars in your pocket.
- **PRIORITY SERVICE:** You get to "cut in line" ahead of non-members - even at our busiest times!
- **PEACE OF MIND:** Your system is safety-checked it's saving you money, and it's working correctly. If it's not, you know who to call!
- **SATISFACTION GUARANTEE:** This agreement can be canceled at any time for any reason, or for no reason, with the unused portion of your dues refunded.

PEACE OF MIND – COMFORT SYSTEM

- 1-CONDENSING COIL** – cleaned if dirty- Value: If dirty, condensing coils raise refrigerant pressures higher than needed, increasing your electric bill
- 2-CONDENSATE DRAIN** cleaned - Value: Algae can plug a condensate drain, capable of causing expensive water damage.
- 3-REFRIGERANT CHARGE** checked - Value: A low or high refrigerant charge can easily go unnoticed and increase operating costs and reduce comfort. An improper charge can cause compressor failure.
- 4-AIR FILTER** replaced (homeowner supplies filter) - Value: A restricted air filter can cause your air conditioner to waste energy and shortens the life of your compressor (complete cleaning of Electronic Air Cells \$60 extra per year).
- 5-CAPACITORS** tested - Value: Malfunctioning capacitors can quickly lead to compressor and motor failure.
- 6-RELAYS AND CONTACTORS** inspected - Value: Worn contactors and loose wire connections can lead to motor or compressor failure.
- 7-CONTROLS and SAFETIES** inspected and tested - Value: Malfunctioning controls and safeties can increase operation cost and cause other components to fail, causing dangerous problems
- 8-THERMOSTAT:** Checked and calibrated - Value: Improperly calibrated thermostats allow the unit to run longer than necessary. Every degree your air condition operates below optimal settings can add 5% to 8% to the cost of cooling your home.
- 9-MOTORS** inspected - Value: Dirty motors are not as effective and will fail sooner
- 10-TEMPERATURE and PERFORMANCE** checked - Value: An accurate record of your equipment's vital data can indicate potential problems. We keep all of your data on record so that we can properly and efficiently keep you comfortable in your home
- 11-DUCT WORK** visually inspected . - Value: Leaks in your duct system can dramatically increase your home's energy consumption and your monthly energy bill.
- 12-BELTS and PULLEYS** inspected and adjusted - Value: Loose belts and worn pulleys decrease air flow, increase operation costs and shortens compress or life. Belts crack and break with age shortens compress or life. Belts crack and break with age.
- 13-LUBRICATION** of motors and bearing - Value: Improperly lubricated rotating equipment will fail rapidly.
- 14-CRANKCASE HEATER** operation fully checked - Value: Crankcase heaters that do not function properly can lead to compressor failure.
- 15-UNIT DISCONNECT** inspected - Value: A worn or overheated disconnect can cause a fuse to blow and become dangerous.
- 16-UNIT WIRING** inspected and tightened - Value: Loose connections can lead go motor or compressor failure.
- 17-BLOWER ASSEMBLY** checked - Value: Your motor will last longer and the temperature inside your home will be more comfortable as a result
- 18-ALL PANELS** secured - Value: Loose panels can increase operating costs and cause a dangerous condition.
